## **DETAILED ACTION**

## Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: claims 9 and 28

Species B: claims 10 and 29

Species C: claims 11 and 30

Species D: claims 12 and 31

Species E: claims 13 and 32

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species A: claims 9 and 28, drawn to a plasma electrode including an object-to –bebonded holding electrode and a counter surface electrode

Species B: claims 10 and 29, drawn to an RF plasma power supply

Species C: claims 11 and 30, drawn to a pulsed-wave plasma power supply capable of adjusting a pulse width

Species D: claim 12 and 31, drawn to a first and second low-pressure plasma emitting means.

Species E: claims 13 and 32, drawn to a low-pressure plasma and an atmosphericpressure plasma

The following claim(s) are generic: 8 and 27.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The general inventive concept, a plasma treatment means for changing the ion strike force, is known from Nagakubu et al (US 5904860).

Nagakubu et al. discloses an ionizing chamber that generates plasma of the desired frequency, changing the energy (ion strike force) from 200 eV to 10 eV (col. 4 lines 8-10, 34 and 62).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emily Chimiak whose telephone number is (571)272-6486. The examiner can normally be reached on Monday-Friday 8:30-5:30 EST.
